Redshift Distribution of the LRGs

Survey Power = Luminosity Sensitivity x FoV(z)

Peak @ z=5
number density analysis to z=4-6

Relative noise level 4.8[m*π*] *ζ* 4.2 4.0 +2 Δx [arcmin]

© Matthee et al. 2023

Sensitivity in 3D Volume

"Completeness in each 3D grid"

- o x: horizontal direction
- o lambda: line of sight

Almost no-variation in the vertical direction (y)
